

GOOD WILL-HINCKLEY

WE CHANGE LIVES.

Good Will-Hinckley Supports Four Major Programs:

MAINE ACADEMY OF NATURAL SCIENCES

The Maine Academy of Natural Sciences (MeANS) is a public charter school targeting students who are not thriving in a traditional high school setting. Some of these students may have dropped out of school, or be at risk for dropping out. Students at MeANS use a more hands on approach to learning while studying sustainability, forestry and agriculture.

CAMPUS LIVING PROGRAM

Our Campus Living Program serves two purposes. It offers a home to our MeANS students who live too far to commute daily. And it offers a safe environment for students who need an alternative home by providing a peaceful environment so students can focus on their studies during the week while also learning valuable life skills.

L.C. BATES MUSEUM

The primary function of L.C. Bates Museum is educating children about natural and cultural history. The museum's educators reach more than 10,000 children each year. The museum plays a significant role as an inspirational source of community enrichment.

GLENN STRATTON LEARNING CENTER

Glenn Stratton Learning Center (GSLC) is a day treatment school offering educational services to students in grades kindergarten through 12 who experience significant social, emotional and behavioral problems. The GSLC goal is to transition students back into a public school.
